## Investment Manager Commentary

GDP	2022 A	2023 A	2024 E	2025 E	2026 E

The South African economic growth rate of 1.1% forecast for 2024, remains well below population growth of 1.3%, this trend started in 2014, resulting in a dramatic fall in per capita income and wealth over this period. The 2024 outcome is disappointing as the economy was boosted by good global growth, lower inflation, GNU, end to load shedding, benefits of operation Vulindlela, short term benefits of the Two Pot retirement fund reform and an expansive fiscal spend with the budget deficit at an unsustainable -4.5%. The outlook for 2025 and 2026 is an improvement with economic growth forecast to increase by 1.5%. This is still below the rate to reduce the unemployment rate of 32.1% with the unemployment rate in Gauteng at an alarming 34%. Opportunities that could boost growth include, sustained recovery in electricity, rail and port volumes, lower interest rates, a recovery in private sector capital investment and an improvement in employment. Risks that could reduce growth, include further deterioration in municipal infrastructure especially water, poor implementation of NHI, breakdown of GNU, the gas supply cliff and the instability in neighbouring countries.

The South African property market performed strongly in 2024, especially industrial, retail and the coastal markets, with little new supply and improving demand reducing vacancies and rentals. In Cape Town, due to very strong fundamentals, rentals are moving up to rates supporting new development, with vacant land being the key constraint. The Oasis Crescent Property Fund has continued to perform well benefiting from a portfolio of high quality REITS, with positive demand / supply fundamentals in secular growth sectors, with superior balance sheets and excellent management. The Oasis Crescent Property Fund is well positioned to add value over the long term.

### Risk and Reward Profile

The risk and reward indicator:

- The above risk number is based on the rate at which the value of the Fund has moved up and down in the past
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund
- The risk and reward category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'.

The Fund may also be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Sub-Fund
- The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

### Fees and Charges\*

Fee Type	Financial Advisor	Administrator	Investment Manager
Initial	No charge	No charge	No charge
Ongoing	No charge	1.5%	Max of 2% if the portfolio performance exceeds the benchmark

\* Excluding VAT.

### Total Expense Ratio

Class A of the portfolio has a Total Expense Ratio (TER) of 1.77% for the period from 1 October 2021 to 30 September 2024. This implies that 1.77% of the average Net Asset Value of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The ratio does not include transaction costs. Transaction cost was 0.04%.

Total Expense Ratio	1.77%	Service Fees	1.51%	Performance Fees	-	Other Cost	0.03%	VAT	0.23%
---------------------	-------	--------------	-------	------------------	---	------------	-------	-----	-------

Class A: performance fees are payable in the case of outperformance of the underlying portfolio, relative to its benchmark. Performance is calculated for the portfolio, and individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The sharing ratio of the performance fee is 20% of the outperformance, and the total fees are capped at 3%. This fee is calculated and accrued daily, based on the daily market value of the Investment Portfolio, and paid to the Investment Manager on a monthly basis.
