#### Investment Objective and Policy

The Oasis Crescent Income Fund is a Shari'ah compliant fund. The Oasis Crescent Income Fund is a specialist income portfolio. The primary objective is to provide income from the underlying investments. To achieve this objective, the portfolio consists of a combination of South African and global short-term, medium-term and long-term income generating securities permitted by the Collective Investment Schemes Control Act under Notice 90 of 2014.

The portfolio may also include participatory interests or other forms of participation in collective investment scheme portfolios where such collective investment scheme portfolios are generating periodic income flows. Where the aforementioned portfolios are operated in territories other than South Africa, participatory interests or other forms of participation in these portfolios will be included in the portfolio only where the regulatory environment and investor protection provided is of an international standard and is to the satisfaction of the manager and trustee. The trustee ensures that the investment policy set out in the supplemental deed is carried out.

## Investment Manager Commentary

The outlook for the South African economy is improving and there is potential for a meaningful step up in the growth rate following the recent years of stagnation due to the Eskom and Transnet impact. Electricity load shedding peaked in Q2 2023 at an average load shedding stage level of 3.6 and the year on year decline in the load shedding stage level in Q4 2023 was -40% to an average stage level of 1.6 and in Q1 2024 it was -47% year on year decline to an average stage level of 1.5.

	Average Load Shedding Stage	% Year on Year
Q2 2023	3,6	210
Q3 2023	3,0	89
Q4 2023	1,6	-40
Q1 2024	1,5	-47

The reforms that have been introduced by our Minister of Finance is on par with the 1990s and it is creating a platform for growth driven by the energy and transport reform with a broader coalition of partners. These reforms are releasing massive private sector capital and it is also attracting some of the best global energy operators. The reforms have removed limits on public private partnerships and independent global power producers are partnering with major South African groups with projects now hitting the ground. Self-generation of electricity by corporates, shopping centres, commercial and residential property owners have also gained a lot of momentum. We are seeing the same reforms starting to deliver investment in the logistics sector where ports, terminals and the rail infrastructure are attracting the attention of private sector capital and private operators. The South African financial and banking sector have significant capacity to provide the necessary funding to the private sector in the energy, logistics and infrastructure sectors.

Factors that could stimulate economic growth are: 1) Increased private sector electricity provision and an end to widespread loadshedding; 2) Improvement in logistical bottlenecks; 3) Rise in commodity export prices; 4) Onshoring boosted by supportive government policy; 5) Faster cuts in interest rates.

Factors which could slow the SA economy further are: 1) Escalation of global geo political stress; 2) Instability resulting from the May 2024 election; 3) Sharp decline in commodity exports prices; 4) Delayed cuts in interest rates; 5) Failure to address skills deficit; 6) Labour unrest/strikes

SA bonds continue to provide some of the highest real value amongst peers and remains very attractive. On a real-term basis, the SA 10 year bond provides a real yield of more than 7.0%, well above its long-term average of 3.5%. In addition, foreign investors are significantly underweight local bonds relative to history and as we see a recovery in activity and growth we expect foreign investors to return as the economy improves. These high nominal and real yields are creating opportunities to invest in attractive yields at longer duration and we actively manage our duration over the cycle in order to maximise returns for our income portfolios. We remain focused on investing in high quality issuers with strong and sustainable cash flows and participated in the recent issue of asset backed Sukuk issued by the South African government. ## Risk and Reward Profile

**The risk and reward indicator:**

- The above risk number is based on the rate at which the value of the Fund has moved up and down in the past
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund
- The risk and reward category shown is not guaranteed and may shift over time
- The lowest category does not mean 'risk free'.

The Fund may also be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Fund
- The Fund invests in a variety of geographic regions and countries. It is therefore exposed to the market sentiment of that specific geographic region or country. This level of diversification is appropriate to deliver on our objective to generate real returns at a lower volatility for our clients over the long term.

## Disclaimer

This document is the Minimum Disclosure Document in terms of BN92 of 2014 of the Collective Investment Schemes Control Act, 2002 and also serves as a fund fact sheet. Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future.

Different classes of units apply to some of the Oasis Funds, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available from the management company on request. Commission and incentives may be paid and if so, would be included in the overall costs. CIS are traded at ruling prices and forward pricing is used. CIS can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. No guarantee is provided with respect to capital or return.

Portfolios are valued at 15h00 daily. All necessary documentation must be received before 10h00. CIS are calculated on a net asset value basis which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio which may include brokerage, commissions, STT, auditor's fees, bank charges, trustee and custodian fees. CIS prices are available daily on [www.oasiscrescent.com](http://www.oasiscrescent.com).

The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. The manager is a member of the Association for Savings and Investment SA. The above portfolio performance is calculated on a NAV to NAV basis and does not take initial fees into account. Income is reinvested on the ex dividend date. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Figures quoted are from Micropal and I Net Bridge for the period ending 31 March 2024 for a lump sum investment using NAV-NAV prices with income distributions reinvested.
